

JUSTIFICATION FOR REMOTE AUDIT

As the representative of the Certification Body named below, I hereby declare that the technical feasibility of conducting a remote audit is positive, for any of the following reasons:

- ☐ The national measures of the country where the assessment would take place, limit the entrance of foreigners; therefore, a presential audit from foreign certification bodies is not possible.
- ☐ The mobility in the country where the assessment would take place is restricted by national regulations; therefore, national certification bodies cannot develop a presential audit.
- ☐ The company/organization has the human and technological capacity to support a remote audit, accomplishing a good performance during the audit process.
- ☐ The certification body acknowledges the potential limitations that a remote audit might represent.

Consequently, I recommend conducting the requested remote audit without any further due, considering that all technological infrastructure and equipment must be guaranteed.
